

Holder of a Master's degree in Innovative projects. I've acquired solid academics knowledges in science and varied professional experiences. I currently have 13 years of professional experience. I am looking for a career development in the management of innovative projects.

I am quite passionate about science since the start of my career. I am educated both in science and project management. I have quite diverse experiences ranging (laboratory, R&T). Through those experiences I developed scientific skills but also team working within a diverse set of individuals.

I am opened to any opportunity for collaboration in the fields of innovation, creativity, marketing, finance, R & T, quality and project management. With my dual skills I am open to working in any field.

Feel free to contact me for any further information.

Driving License

Experiences
